Formation and Evolution of Early Intervention for Children with Developmental Delays in Russia and Abroad

Keywords: Developmental delays, Early intervention, Russia, Abroad.

Abstract: This paper discusses the importance of early intervention for children with developmental delays in Russia and abroad. It highlights the need for collaborative efforts between educators, parents, and policymakers to ensure effective support systems for these children.

Keywords: Developmental delays, Early intervention, Russia, Abroad.

Introduction: Developmental delays can have significant impacts on a child's future success. Early intervention is critical in addressing these challenges.

Methods: The study involved a review of existing literature and case studies from both Russia and abroad to understand the effectiveness of early intervention programs.

Results: The research found that early intervention programs, when implemented effectively, can significantly improve outcomes for children with developmental delays.

Discussion: Collaboration between countries is essential in sharing best practices and resources.

Conclusion: Further research is needed to develop more tailored interventions for children with developmental delays.
