Из истории лексикографического описания фразеологического и паремиологического фондов татарского языка

(History of lexicographic description of the phraseological and paremiological funds of the Tatar language)

The paper is a chronological overview of practical phraseography of the Tatar language. It deals with the problems of idioms, sayings and proverbs dictionaries organization on the level of their macrostructure. The paper reflects the results of the comparative research into nearly all idiom dictionaries of the Tatar language and the most of the dictionaries of the Russian and English languages.
